

Christian Dominic Baraceros

Software QA Engineer

baracerosc@gmail.com | +63 922 257 1821 | linkedin.com/in/baraceros-cd | Taguig, Philippines

PROFESSIONAL SUMMARY

Results-driven QA Engineer with 3+ years of progressive experience in manual testing, API testing, and quality assurance across mobile and web platforms within Agile/Scrum and Kanban environments. Proven ability to own the full STLC — from test strategy and test case design to defect tracking, regression testing, and production release validation. Experienced in SQL data verification, root cause analysis, and leveraging AI tooling to drive team efficiency. Experienced operating independently as a solo QA on high-priority teams while mentoring and onboarding incoming QA hires.

TECHNICAL SKILLS

Testing: Functional, Regression, Smoke, Ad-Hoc, Exploratory, UAT, Usability, UI/UX, End-to-End, API Testing, Soak Testing, Bug Fix Verification, Mobile Testing (Android/iOS)

QA Tools: Qase, Postman, LambdaTest, WDK (Traceview, Inf2Cat, StampInf, mfttrace), Miro, Figma, TestFlight, Firebase

AI & Automation Tools: Claude (Code, Design, Artifacts), Gemini, ChatGPT, UiPath, Zapier, Make.com, n8n

DevOps & PM: Azure DevOps, Jira, Notion, Trello

Development: Visual Studio, Microsoft Office Suite, Google Workspace (G Suite)

Operating Systems: Windows, macOS

Methodologies: Agile, Scrum, SDLC, STLC, Defect Lifecycle Management, Root Cause Analysis

Other: Driver Signing (Microsoft & Company Certs), SQL Data Verification, Hardware & Software Troubleshooting

PROFESSIONAL EXPERIENCE

Anytime Mailbox - Bugo Corp | Remote

Software Quality Assurance Engineer

October 2024 – Present

- Act as the sole QA engineer on a high-priority mobile-focused product team, owning the full STLC — from sprint planning and test strategy through to production deployment — within an Agile/Scrum and Kanban environment.
- Execute End-to-End, Discovery/Replication, Regression, Smoke, Soak, and Bug Fix Verification tests across iOS and Android platforms using Firebase and TestFlight for build distribution and testing, ensuring thorough feature-to-production test coverage each release cycle.
- Design and maintain comprehensive test plans, test cases, test data, and test scenarios aligned with company QA standards; responsible test cases actively maintained in Qase.
- Conduct basic API testing using Postman and backend data verification using SQL, validating endpoint behavior and data integrity.
- Execute structured regression test suites each sprint cycle to safeguard existing functionality against new code changes and prevent production defect leakage.
- Collaborate directly with developers and product stakeholders within Agile sprints to review requirements, clarify acceptance criteria, and align testing scope with business goals.
- Document, track, and drive defects through the full defect lifecycle using Azure DevOps, maintaining clear communication with development teams until resolution and closure.

- On-call via PagerDuty twice weekly to monitor and respond to critical production incidents outside of business hours, ensuring minimal downtime and swift issue escalation.
- Authored QA process documentation — including step-by-step testing procedures, feature testing guides, and standardized testing workflows — improving team consistency and reducing new hire onboarding time.
- Integrated AI tools such as Claude/Gemini into QA workflows to accelerate test case generation and documentation, reducing manual documentation effort and improving overall team throughput.
- Lead structured knowledge transfer sessions and onboard newly hired QA team members, developing training materials and providing mentorship to accelerate ramp-up.

Vavasoftware, Corp. | Taguig City, Metro Manila

Software QA Engineer

June 2024 – October 2024

- Executed comprehensive functional testing across 5 company-supported casino websites — covering Smoke, Regression, Exploratory, Ad-Hoc, Usability, and UI testing across full staging-to-production release cycles.
- Investigated, reproduced, and documented user-reported defects across web and mobile platforms (Android & iOS), coordinating root cause analysis and resolution with the development team.
- Delivered QA coverage for racing simulator games and hardware peripherals (e.g., steering wheels), validating device input responsiveness, compatibility, and simulation accuracy.
- Developed no-code automation workflows using UiPath to eliminate repetitive manual testing and office tasks, reducing manual effort by 2 hours per week.

Datronicsoft Inc. | Pasig City, Metro Manila

Software Tester & User Technical Support

November 2022 – April 2024

Software Testing

- Managed end-to-end release cycles for Spacedesk software across major releases, coordinating patch validation, bug fix rollouts, and deployment readiness with the development team.
- Performed manual regression testing and user acceptance testing (UAT) to validate bug fixes and ensure software stability before release.
- Troubleshoot and validated Windows drivers using WDK tools (Traceview, Inf2Cat, StampInf, mfttrace) and WHLK, ensuring hardware compatibility and driver integrity across multiple driver versions.
- Signed driver files (.sys and .dll) using both Microsoft and company-issued certificates, following proper release procedures.

User Technical Support

- Validated and reproduced 5+ user-reported software issues per month, performing root cause analysis and escalating critical bugs to the development team for timely resolution.
- Provided technical support for issues related to Windows OS, virtual machines, mobile devices, and hardware peripherals.
- Managed the Spacedesk community forum with 17,680+ active users, handling multiple inquiries on licensing, features, and technical support.
- Coordinated website content updates to ensure users had access to accurate and timely product information.
- Monitored user feedback and proactively communicated upcoming releases, new features, and bug fixes to the community.

EDUCATION

Bachelor of Science in Computer Engineering

Rizal Technological University — Mandaluyong, Metro Manila | 2018 – 2022
